

S3. Statistical analysis of Molecular complex difference between normal and cancer protein interaction networks.

Tissue	Normal	Cancer
Cervix	6	30
Lung	24	30
Ovary	14	33
Prostate	21	25
<i>P</i> -value		0.02237

Supplementary 3 of:

Banik, R., Rahman, M., Rahman, K., Islam, M., & Enayetul Babar, S. (2016). Comparison of molecular signatures in large-scale protein interaction networks in normal and cancer conditions of brain, cervix, lung, ovary and prostate. *Biomedical Research and Therapy*, 3(4), 605-615.
